

Agenda

- Introduction of corrosion in water/wastewater
- Mechanism of corrosion, its types (galvanic and more)
- Internal corrosion – bacterial and/or chemical
- Oxidation vs. corrosion
- Real-life corrosion failures
- Protection & prevention mechanisms
- Tuberculation and linings
- Surface preparation & more
- Q&A

Training Session Dates:

We will email the connection and Zoom information 48 hours prior to each class. Classes are limited to 20 attendees each.

**Wednesday, October 14,
2020**

7:30-9:30AM

**Thursday, October 22,
2020**

1:30-3:30PM

Maine Water Utilities Association
15 University Dr
Augusta ME 04330

Basics of Corrosion & Protections

Protection and corrosion
prevention for DI pipe

*Live "Virtual" Training
Sessions*

**2.0 Maine BLWSO TCHs
2.0 Maine DEP TCHs**

**McWANE
DUCTILE
IRON STRONG**

Your Instructor(s):

Jerry Regula – National Product Engineer, McWane Ductile

JR has been with McWane Ductile for 30 years and is well experienced in all facets of the manufacturing and installation process of DI water & sewer products. He is further qualified in hands-on assistance and guidance.

Ken Rickvalsky – National Product Engineer, McWane Ductile

Ken has spent 14 years with Griffin Pipe Products and more recently 16 years with McWane Ductile continuing services of engineering design, system troubleshooting, field assistance and more guidance. If it has happened to a utility, he has seen it.

Registration Fee:

Member - \$55.00

Non-meber - \$70.00

Class Description

This course will explore the principles of water/wastewater corrosion simply, while overviewing the knowns to allow you to decide what protections will work best for you in your unique situations and environments.

Further, the contributors to corrosion will be introduced. Sources of internal corrosion and the proven resolve for each will be detailed.

As usual, bring your questions as your instructors will be ready to address any issues or difficulties you may be facing.
